

Hi \_\_\_\_\_ ,

We are the students from \_\_\_\_\_ .

We are currently learning about barriers in our built environment, and are looking to raise awareness about accessibility & inclusion.

In examining our community, we've noticed that your business has a single stepped entry way, which is a physical barrier to many. We'd like to help change that.

We are offering free custom-built wooden ramps to selected businesses in the community. The ramps are engineered and designed by professionals courtesy of the StopGap Foundation.

StopGap specializes in building ramps for businesses just like yours, with the ultimate goal of creating a barrier free society.

Help us make our community accessible to everybody by accepting our ramp.

To learn more about StopGap and how to get a ramp, please email Luke the founder at [luke@stopgap.ca](mailto:luke@stopgap.ca) or visit [stopgap.ca](http://stopgap.ca) for more info.

Together we can create a barrier-free society!

Sincerely,
