

STEP 1 Book your Introduction to the StopGap School Project with Luke Anderson and complete your pre-survey

ACCESSIBILITY AUDIT

Start with the Accessibility Audit lesson plan, click here to watch an intro video to [Task #1](#). Here you will survey your neighbourhood to find out which spaces are accessible, and which are not. Your job is to find at least five businesses with single stepped entryways before moving onto the next task.

STEP 2 Luke will visit and invite your school community to work with StopGap in helping create a barrier-free world! Luke will introduce the StopGap School Project and assign your school three culminating tasks:

2

- Accessibility Audit • The Pitch • Ramp Up!

THE PITCH

Once you have identified the businesses with single stepped entryways, move on to [Task #2](#) - click here to watch an intro video to Task #2. Here, you will create your pitch to encourage those businesses to participate in this exciting and important project. If they act quickly the first five business will get a ramp at no cost!

STEP 3 Review the Work Plan document and design a timeline for your StopGap School Project. Watch instructional videos attached to each of the three culminating task lesson plans for further guidance. You can stick to the assigned tasks, or add alternate lessons to your project by browsing our online resources.

3

RAMP UP!

[Task #3](#); it's time to Ramp Up! - click here to watch an intro video to Task #3. StopGap will deliver five ramps to your school that you will paint and deliver. Please let us know if you would like StopGap to assist you with this process.

STEP 4 Celebrate! Now that your hard work has paid off, throw yourselves a StopGap Fun-raiser to showcase your work, raise funds to help keep this project going, and thank your community partners! Challenge other schools to take on this project!

4

STEP 5 Provide us with feedback by completing your post-survey
